

Business Requirements Document (BRD)

Project Title: Customer Financial Credit & Risk Analysis Dashboard

PROBLEM STATEMENT

The objective of this dashboard is to analyze customer financial behavior, loan performance, credit risk, and financial stability using customer loan and credit data. The dashboard helps stakeholders monitor approval trends, evaluate borrower risk, identify default-prone customers, and understand how financial indicators such as income, assets, debt-to-income ratio, and credit scores influence lending decisions.

KPI's (Key Performance Indicators)

- Total Customers
 - Total Loans
 - Total Loan Amount
 - Approved Loans Business Requirements Document
 - Rejected Loans
 - Approval Rate %
 - Avg Income
 - Avg Loan Amount
 - Avg Loan-to-Income Ratio
 - Total Assets
 - High Risk Customers
 - Serious Default Customers
 - Serious Default Rate %
 - Avg Credit Score
 - Avg Debt-to-Income (DTI) Ratio
-

Create a 3 Page Dashboard

- Page 1: Executive Overview
 - Page 2: Risk Analysis
 - Page 3: Customer & Financial Insights
 - Interactive navigation buttons should be implemented for smooth page transition
 - Slicers and filters should dynamically control all visuals
-

PAGE 1: EXECUTIVE OVERVIEW

Requirements for Page 1

Customer Overview Analysis:

Analyze total customers and overall loan application distribution.

Loan Performance Analysis:

Evaluate total loan amount, approvals, rejections, and lending performance.

Approval & Rejection Trends:

Understand approval behavior and compare approved vs rejected applications.

Credit & Risk Distribution:

Identify customer distribution across different credit score and risk categories.

Age Group Financial Analysis:

Understand how loan amount and average income vary across age groups.

Employment-based Loan Insights:

Analyze loan applications based on employment status categories.

Charts Requirements (Page 1)

1. Loan Status Distribution (Donut Chart)
 2. Loan Amount & Income Analysis by Age Group (Combo Chart – Column + Line)
 3. Credit Score Distribution (Column Chart)
 4. State-wise Loan Exposure Analysis (Map / Filled Map Chart)
 5. Customers by Risk Rating (Donut Chart)
 6. Loan Applications by Employment Status (Clustered Column Chart)
-

KPI Cards (Page 1)

- Total Customers
 - Total Loans
 - Total Loan Amount
 - Approved Loans
 - Approval Rate %
 - Rejected Loans
-

Slicers on Page 1

- Gender
 - Loan Status
 - State
 - Employment Status
-

Insights Generated (Page 1)

- Loan approvals and rejections remain nearly balanced.
- Medium-risk customers form the largest customer segment.

- Adult and middle-aged customers contribute the highest loan amounts.
 - Employment categories show similar loan application patterns.
-

PAGE 2: RISK ANALYSIS

Requirements for Page 2

High Risk Customer Identification:

Identify customers with high financial and repayment risk.

Default Behavior Analysis:

Analyze impact of previous defaults on customer loan risk.

Credit Score Impact:

Understand how credit scores influence approval and rejection decisions.

Debt Burden Evaluation:

Analyze relationship between Debt-to-Income ratio and customer risk level.

Employment Risk Profiling:

Evaluate risk distribution across employment categories.

Default Risk Analysis:

Identify employment groups contributing more toward default risk.

Financial Stability Monitoring:

Monitor serious default customers and overall default percentage.

Charts Requirements (Page 2)

1. Credit Score vs Loan Status (Horizontal Bar Chart)
 2. Debt-to-Income Ratio by Risk Level (Column Chart)
 3. Previous Defaults Distribution (Horizontal Bar Chart)
 4. Credit Score vs Debt-to-Income Risk Distribution (Scatter Plot)
 5. Employment Status vs Risk (100% Stacked Column Chart)
-

KPI Cards (Page 2)

- High Risk Customers
- Serious Default Customers
- Serious Default Rate %
- Avg Credit Score
- Avg Debt-to-Income (DTI) Ratio

Slicers on Page 2

- Risk Rating
- High Risk Flag
- Credit Score Group

Insights Generated (Page 2)

- High debt-to-income ratio is strongly associated with increased financial risk.
- Customers with previous defaults contribute significantly to risky loan profiles.
- Approved customers maintain higher average credit scores than rejected customers.
- Medium-risk customers dominate across all employment categories.

 PAGE 3: CUSTOMER & FINANCIAL INSIGHTS

Requirements for Page 3

Income Analysis:

Understand average income distribution across different age groups.

Loan Behavior Analysis:

Analyze customer borrowing behavior based on debt and income levels.

Asset vs Loan Comparison:

Evaluate relationship between customer assets and loan amounts.

Loan Purpose Analysis:

Identify the most common purposes behind loan applications.

Marital Status Impact:

Understand how marital status influences approvals and rejections.

Debt Influence on Borrowing:

Analyze how debt levels impact loan approval behavior.

Financial Position Evaluation:

Compare assets, income, and loan exposure across customer segments.

Charts Requirements (Page 3)

1. Avg Income by Age Group (Column Chart)
2. Avg Assets vs Loan Amount by Risk Rating (Combo Chart)
3. Loan Purpose Distribution (Treemap Chart)

4. Loan Status Distribution by Marital Status (100% Stacked Bar Chart)

5. Debt Level vs Loan Status (100% Stacked Bar Chart)

KPI Cards (Page 3)

- Avg Income
 - Avg Loan Amount
 - Avg Loan-to-Income Ratio
 - Total Assets
 - High Debt Customers
-

Slicers on Page 3

- Income Group
 - Credit Group
 - Marital Status
-

Insights Generated (Page 3)

- The average loan-to-income ratio reflects balanced borrowing behavior among customers.
 - Personal and auto loans contribute the highest share of applications.
 - Adult and young customers generate the highest average income across age groups.
 - Debt level significantly influences approval and rejection patterns.
-

Dashboard Features

- Interactive and fully dynamic dashboard
 - Professional UI with color-themed pages
 - Navigation panel for page switching
 - Dynamic KPI cards with icons
 - Interactive slicers and filters
 - Data-driven insights section on every page
 - Risk segmentation and financial profiling analysis
 - Responsive chart interactions across all pages
-

Expected Business Outcomes

- Improve loan approval decision-making
- Reduce financial risk exposure
- Identify high-risk and default-prone customers quickly
- Understand customer financial behavior effectively
- Support strategic lending and risk management decisions
- Enhance financial performance monitoring through visual analytics
